"LIFTING" EFFECT*

The flap beats combined with a sequential suction of the LIFT heads intensely stimulates the skin. This skin fitness wakes up dormant fibroblasts (skin youth cells) which synthesize once again collagen, elastin and hyaluronic acid.

Redensified, **the skin is visibly smoother and plumper.**

Wellbox®[S] integrates the new **SPS+™**, technology for a twice as effective anti-aging action.

** *Sequentiality Power Stimulation:*
16 flap beats per second.

* Satisfaction survey conducted in New York by Clinical Research Laboratories (New York, US) on the personal use of Wellbox® on one half of the face, by 36 women aged 35 to 55 years for 4 weeks.

A grayscale close-up of a woman's face, looking slightly to the right. A bright red diagonal band runs from the bottom left towards the top right, crossing her cheek and chin. A white, handheld LPG device is positioned on the red band near her cheek. The device has a small black square with the letters 'LPG' on it. There are faint, light gray square markers on her forehead and cheek. The background is plain white.

AROUND THE THIGHS*

The painless stimulation of the ROLL heads on the skin accelerates the elimination of fat, even the most resistant. By targeting adipocytes (the cells responsible for the elimination of fat), Wellbox®[S] cellular stimulation helps to recover a **slimmer and fitter body**.

Wellbox®[S] integrates the new **SPS+™**, technology, for a twice as effective firming action.

** *Sequentiality Power Stimulation:*
16 skin suctions per second.

* Satisfaction study conducted by the American Cellulite Task Force Laboratory (Miami, USA) on the personal use of Wellbox® on one thigh, by 21 women aged 25 to 55 years for 10 weeks.
